

# Aqua Guard WP 200

## Water Proofing Admixture for Cement

### Description

A ready to use waterproofing admixture for concrete, plaster and brick laying mortar in powder form.

### Uses

AQUAGUARD is used to waterproof water tanks, swimming pools, basement, facades, floor toppings, Brick/block making, Pre-Cast Concrete and for Damp Proof Course rendering (DPC).

### Advantages

AQUAGUARD contains pore-sealing and water-repelling substances which provide the following beneficial properties:

- Improved workability without increased water.
- Increased impermeability
- Chloride free.
- Lubricating agent to extend efficiency of automatic brick and block making machine.

### Dosage

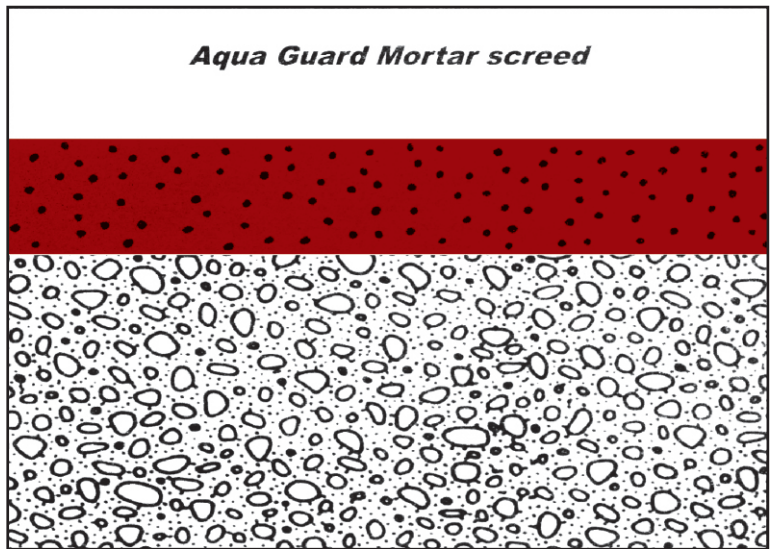

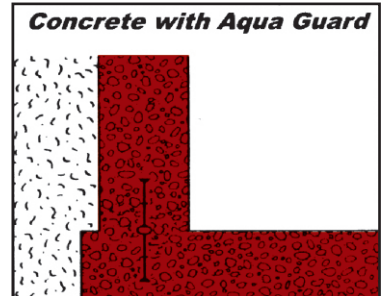

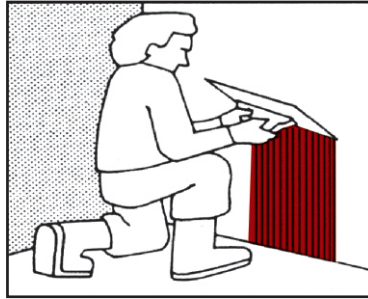

2% by weight of cement. (1kg. of AQUAGUARD should be added to 50kgs. of cement bag.)

### Mixing

Add AQUAGUARD to the mix at the same time as cement and aggregates. Dry mix for 3 minutes before adding water.

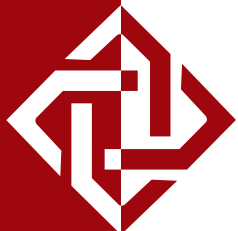

### Packaging

40 x 1kg Bags.

### Technical Data

Type:	Hydrophobe Substances
Colour:	White to Off White
Specific Gravity:	0.9kg/L
Storage Conditions:	Dry but unaffected by Frost.
Shelf Life:	2 years when unopened
